

Teamwork Reflection (IDS 706)

Zhanylai Turatkhan Kyzy

MIDS

Introduction

As someone who is very new to programming , I was multiple parts of the project and worked on the application code, Dev Ops, documentation and server setup for our IDS706-final-project. The project was very enlightening and even though it was difficult sometimes, I learned a lot from it. Working in my team was the best part of the project.

Peer Evaluation

1. Antara Bhide:

- **Positive Attributes:**
 - **Focus:** She is very focused.
 - **Communicating** : She was amazing at communicating her ideas
 - **Detail oriented:** Her ability to pay close attention to details amazing.
- **Areas for Improvement:**
 - **Coding skill:** She might want to focus more on improving her coding.
 - **Managing tasks and time:** She should regulate the time she puts into each task
 - **Regular updates:** She might benefit from keeping her teammates more updated about changes she makes to the code.

2. Anastasiia Saenko

- **Positive Attributes:**
 - **Kind** : Very friendly and helpful
 - **Easy to work with** : Very easy to work and communicate with.
 - **Research** : She is good at research
- **Areas for Improvement:**
 - **Technical Skills:** Improving her technical skills and understanding of technical concepts

- **Presentation** : She can improve her presentation skills
- **Organizational Skills**: She can become more organized in her approach to projects

3. Gunel:

- **Positive Attributes:**
 - **Quick**: She is really fast with her work
 - **Creative**: She has a lot of ideas.
 - **Patience**: She is very meticulous.
- **Areas for Improvement:**
 - **Focus**: She can improve her focus
 - **Frequent Communication**: She can communicate a little more frequently
 - **Time Management**: She can improve how she manages her time and tasks

Feedback Session Outcome : Our feedback session was very nice. We communicated our experience with each other. Everyone took their respective areas for improvement in an extremely mature manner. It was a learning experience for us all since we were able to see ourselves from a co-worker's eyes. I think it has benefitted me a lot and I can now work on traits that I did not realize I needed to work on.

This concludes our IDS706 final project. I (Zhanylai) would like to extend my gratitude to my three teammates, Antara, Anastasiia and Gunel for having been so wonderful to work with. I wish them all the best.
