

# Teamwork Reflection (IDS 706)

## Gunel Aghakishiyeva

### MIDS

#### Introduction

As someone who is passionate about programming , I was involved in all parts of the project and worked on the application code, Dev Opc documentation and server setup for our IDS706-final-project. The project was very enjoyable and even though it was challenging, I learned a lot from it. Working in a team was the best part of the project.

#### Peer Evaluation

##### 1. Anastasiia Saenko:

- **Positive Attributes:**
  - **Fast coder:** She is very good at coding
  - **Communication:** She was amazing at communicating her ideas
  - **Observant:** Her ability to pay close attention to the progress of the project and catch potential problems is amazing.
- **Areas for Improvement:**
  - **Focus:** She might want to focus more on that task at hand.
  - **Managing tasks and time:** She should regulate the time she puts into each task
  - **Keeping team members in the loop:** She might benefit from keeping her teammates more updated about changes to the code.

##### 2. Zhanylai Turatkhan Kyzy

- **Positive Attributes:**
  - **Kind :** Very friendly and helpful
  - **Easy to work with :** Very easy to work and communicate with.
  - **Research :** Nice ability to research new ways to do something.
- **Areas for Improvement:**
  - **Technical Skills:** Improving her technical skills and understanding of technical concepts

- **Presentation** : She can benefit from improving her presentation skills
- **Organizational Skills**: She can become more organized in her approach to projects

### 3. Antara Bhide

- **Positive Attributes:**
  - **Quick**: She is really fast at getting work done
  - **Creative**: She has several new and creative ideas to approach a problem
  - **Patience**: She has the patience to withstand problems in the code and overcome them
- **Areas for Improvement:**
  - **Technical Knowledge**: She can improve her technical knowledge
  - **Frequent Communication**: She can communicate a little more frequently
  - **Time Management**: She can improve how she manages her time and tasks

**Feedback Session Outcome** : Our feedback session was helpful. We communicated our experience with each other. Everyone took their respective areas for improvement in an extremely mature manner. It was a learning experience for us all since we were able to see ourselves from a co-worker's eyes. I think it has benefitted me a lot and I can now work on traits that I did not realize I needed to work on.

---

**This concludes our IDS706 final project. I (Gunel) would like to extend my gratitude to my three teammates, Antara, Anastasiia and Zhanylai for having been so wonderful to work with. I wish them all the best.**
